

Vupt SIG Lite Pre-fill v1.0 \placeholder\

v1.0 PLACEHOLDER CI pandoc build will replace this with the rendered PDF.

Source: docs/legal/sig-lite-prefill.md (~31 KB markdown)

Coverage: 126 SIG Lite questions across 7 domains:

- A. Information Security (54 questions)
- B. Privacy (20 questions)
- C. Compliance (14 questions)
- D. Network Security (8 questions)
- E. Cloud Security (6 questions)
- F. Incident Management (5 questions)
- G. Business Continuity (6 questions)
- H. Additional SIG Lite (industry-specific) (13 questions)

Build mechanism: scripts/build-sales-pdfs.sh + .github/workflows/build-sales-pdfs.yml

Render engine: pandoc + xelatex (per RESEARCH §T9 + Assumption A8)

Until the CI build runs against main, this single-page PDF stands in so the /enterprise download link from Plan 03-04 resolves without 404. Read the markdown source at docs/legal/sig-lite-prefill.md for the substantive content.

Plan 03-09 Last updated 2026-05-15.
